Below is our attempt to create a rigger self assessment quiz. This quiz is not an end all be all, it does not certify anyone or anything as safe. It is an attempt to give people a tool to assess their own knowledge as a rigger or for you to assess a potential rigger and check what they know. It was created to address two problems.

The first is imposter syndrome where people do not yet have confidence in their skills or a base line of comparison. The second is to address the dunning-kruger effect where beginners believe themselves more skilled than they are.

It is broken into 5 parts and a score of 0-35 roughly means you are still a beginner. A score of 35-75 tags you in the intermediate range. 75 or higher and you're heading into the advanced range. This assumes a relatively even distribution across all categories.

The quiz covers much more than just knowledge of rope as their is much more to being a rigger than just tying knots. After all, rope safety tip #1 is you are not tying rope, you are tying a person, talk with your person.

As this is a creation over time of multiple people it is for use by anyone so yes, you may steal this quiz but if you could give the site a shout out as you do, that'd be appreciated. <u>miropes.smirc.net/ropetest</u>

People and negotiation: */25 Human Knowledge and Safety: */25 Terms/Knots/Patterns: */25 Equipment Knowledge and Safety: */25 Bonus skills questions: */15 YOUR TOTAL SCORE People and negotiation - Do you ask these guestions? Do you know why you should? (Yes=1, No=0) Yes/No What interests you about rope? What kind of tie are you looking to do or try? How do you want the tie to make you feel? Do you have any joint injuries? If yes - what are they and from what? Do you get motion sickness? Do you have any false limbs or implants? Do you have any joint or muscle conditions? Do you have a history of seizures? Have you consumed any alcohol today? Have you used any drugs today? Are you on any medications that could affect your ability to feel pain? _ Are you claustrophobic? Is there someone you would want me to contact in the case of emergency? Is your partner here or are there any relationship dynamics I need to consider? How is your flexibility? Can you demonstrate your range of motion? Do you have any communicable skin conditions or diseases relevant to what we are doing? Do you have any new piercings or tattoos I should be aware of? Do you have any current injuries that could affect the tie? Have you done this (the type of tie you're negotiating) before? Is there any part of your body you do not want me to touch during the tie? _ Are you ticklish? Do you have any known triggers I should be aware of? Do you have any heart or blood pressure issues? How are you feeling right now? Are you hydrated or do you need to pee? What kind of aftercare do you think you'll need? SECTION TOTAL 0 Human Knowledge and Safety - Do you know the answer to these questions? Do you know why you should? (Yes=1, No=0) Yes/No What are safe words and why should you always have them?

What are safe signs in the event of a loud space or the person is gagged? - What are the three major nerves in the arm to be aware of? What happens if they are compressed? - Can you point to where the nerves are the most exposed on the arm? - What are the main arteries on the arm to be aware of? What happens if they are compressed? - Can you point to where the arteries are most exposed on the arm? - What first aid steps should you take in the event of a pinched nerve or artery? - What are the pressure points along the clavicle and in the center sternum that can cause pain or nerve compression? What happens if they are compressed? - Can you point to where the clavicle and sternum nerves are? - - How does compression of the chest or sternum area affect breathing? - - What are the major nerve clusters in the hip area that can be injured by many hip harnesses? What happens if they are compressed? - Can you point to the pubic nerve cluster and femoral nerve? - - What is the main artery on the inside of the thigh beneath the groin? - - Can you point to the femoral artery? - - - What is the tibial nerve? What happens if they are compressed? - - - Can you point to the tibial nerve at both the knee	- - - - - or nerve - - - - -
Can you point to where the nerves are the most exposed on the arm?-What are the main arteries on the arm to be aware of?
